

Everply

Asphalt Restoration Systems

Restore and Pocket the Savings

A properly installed reflective elastomeric coating system is a proven and cost effective way to rapidly restore an aging asphalt roof. Everest Systems has proprietary technologies for both APP and SBS asphalt substrates. The EverPly asphalt restoration system provides a long term solution without a costly tear off.

Performance

Watertight	Addresses all sources of roof leaks by sealing all seams and penetrations.
Durable	Resistant to damage from roof traffic and storm damage.
UV Resistant	Unlike traditional roofing systems an Everply system has a surface that is designed for even the harshest UV conditions.
Highly Heat Reflective	Dramatically improves occupants' comfort by typically cutting a summer roof surface temperature by up to 75 ° !!
Disruption Free	Installation is completed without bothering building occupants.
Extends Building Life	Cool roof surface will reduce expansion and contraction stresses on your building.
Looks Like New	Aesthetically pleasing final appearance.

Value

Energy Savings	Reduced solar heat gain will cut summer energy costs by up to 30%.
No Tear Off	Typically no costly tear off required.
Low Cost	An Everply system keeps more money in your pocket compared to replacement systems.
Low Life Cycle Cost	With no tear-off and by simply maintaining the protective surface coating on your roof every 10-15 years, your roof can last indefinitely.
Rebates	Many local and federal rebates are available.
Tax Benefits	An Everply system can often be fully expensed in the year of installation.

Environment

No Tear Off	Typically no need to remove roof and fill our land-fills with roof waste.
Water-based	Non-hazardous, non-flammable and easy cleanup.
Low VOC	Meets the most stringent VOC requirements in the U.S.
Low Odor	Can be installed in situations where rooftop air handlers cannot be turned off.
Sustainable	Simply maintaining the protective surface coating on your roof every 10-15 years, your roof will last indefinitely.

EVEREST SYSTEMS

The Everply Asphalt Restoration system can provide an excellent return on investment (ROI). Everply roofs can pay for themselves in as little as 7 years.

Roof surface temperatures can be reduced by as much as 75 ° F!!!

Long Term Performance

Year after year, reflective elastomeric coatings are used to restore millions of square feet of asphalt roofing surfaces. Everest Systems has Acrylic and Silicone options for smooth built-up and granular modified bitumen sheets. Everest Systems' proprietary bleed-blocking primer "locks-in" the oils that can leach through to the surface of many coating systems causing discoloration and delamination. Everest Systems is proud to provide the highest quality systems available in the market place today.

Process

Below is the multi-step process to seal and restore the roof:

1. Make all major repairs to the roof with "Like" materials.
2. Power wash the roof to remove all dirt and contaminants.
3. Apply proper Evercoat Basecoat. (Evercoat SS or Evercoat AC) See Everest guidelines for specific coating for specific substrate.
4. Seal up any seams and penetrations with Evercaulk MC-1.
5. Apply Desired Evercoat Topcoat.

Everply

Asphalt Restoration Products

Everest Systems manufactures a full range of high performance, cost effective, and environmentally friendly products.

Evercoat 272 • Strong • Durable • Flexible polyester reinforcing fabric

Evercaulk MC-1 • 100% solids polyurethane hybrid sealant • Low VOC • Tough • Flexible • Moisture cure

Evercoat EC • Very Durable • 100% Acrylic elastomeric topcoat • Excellent UV protection • Highly reflective • Cost-effective • Low VOC

Evercoat SS • Premium bleedblocking basecoat for APP and smooth built up roofs • Specifically designed for adhesion to APP asphalt surfaces

Evercoat AC • Premium bleedblocking basecoat for SBS and other granulated cap sheets. • Specifically designed for adhesion to SBS asphalt surfaces

Evercoat HT • Highest Performing 100% Acrylic elastomeric on the market • Superior UV protection • Very good reflectivity retention • 500% Elongation • 475 PSI tensile strength • Low VOC algae and acid rain resistant

Eversil 100 • 100% Solids Silicone Elastomeric Coating
