

Gaco WallFoam

SPRAY POLYURETHANE FOAM INSULATION

SMART
FROM THE START.

Since 1955
GACO WESTERN

SMART FROM THE START.

GacoWallFoam spray foam insulation makes complete sense from the moment it bonds to the frame of your home. You can actually see the seal created as liquid foam thoroughly fills every crevice and solidifies into a seamless high performance barrier, specially formulated to protect you, your family and your home investment. Yes, foam insulation of this quality costs more, but consider the benefits: higher R-values, increased energy savings over the life of your home, low long-term maintenance costs, effective sound insulation, added structural strength, resistance to mold, pests and pollutants, and even reduced installation and construction waste. With GacoWallFoam, you start smart and stay strong with energy savings of up to 40% over other insulation techniques, allowing you to recoup your initial investment in as little as five years.

ENERGY-EFFICIENT.

Gaco's Air Seal Advantage: a single, solid, energy-saving barrier.

The secret to energy efficiency is simple: keep the outside air out, and the inside air in. Unfortunately, air can travel through even the smallest cracks, holes or seams. Even with traditional fiberglass insulation, air easily passes through the spaces between the wall studs and the insulation batts, reducing the effective R-value of the assembly. GacoWallFoam has no seams or cracks because it immediately expands to fill every nook and cranny. And because GacoWallFoam doesn't shrink, settle or sag over time, the "Air Seal Advantage" continues to provide energy savings year after year.

A COMPLETE AIR SEAL

Superior home insulation begins by keeping outside air out and inside air in. When GacoWallFoam is applied, it is sprayed into the stud wall cavity, where it immediately expands to fill the available space. So, unlike fiberglass insulation, GacoWallFoam completely seals air gaps and seams to create the highest level of insulation value for your home.

STRONG.

Designed to protect. Made to last.

When GacoWallFoam is sprayed into the stud wall cavity of a home its two liquid components become chemically bonded, creating a rigid plastic-like material that ties the studs and the exterior sheathing together as one. In technical terms, this is called a monolithic wall barrier, because there are no gaps or voids – only one single uniform structure. That structure actually strengthens the framing of your house, providing added protection against the elements and increasing the longevity of your home.

Breathe easier. We have you covered.

The same GacoWallFoam air seal that prevents air from flowing in and out works equally hard at preventing outdoor pollutants such as smog and pollen from penetrating your home – not to mention pests and rodents. And because GacoWallFoam creates a seamless moisture barrier, it inhibits the growth of mold and bacteria. All that adds up to a safer, healthier home for you and your family.

HEALTHY.

RESISTANCE TO COMMON HOUSEHOLD CONTAMINANTS

CONTAMINANT	TRADITIONAL FIBERGLASS INSULATION	GACO WALLFOAM
Mold	NO	YES
Mildew	NO	YES
Bacteria	NO	YES
Air Pollution	NO	YES
Pollen	NO	YES
Insects	NO	YES
Rodents	NO	YES

GREEN.

Good for your home. Good for the planet.

There are obvious long-term benefits that come from having a more energy-efficient home, including reduced energy consumption and reliance on fossil fuels. In addition, the added structural integrity that GacoWallFoam provides for your home will result in a home that will last longer and won't require insulation upgrades, which create debris for landfills. Plus, the application of GacoWallfoam is a cleaner process than other insulating materials, which means less mess and waste right from the start, and no resulting depletion of the ozone layer.

GacoWallFoam meets Government requirements for a Federal Tax Credit for Installation of Insulating Materials in a Private Dwelling.

QUIET.

Peace and quiet. Peace of mind.

Not only does GacoWallFoam create a barrier to keep air out, it also keeps noise out, thanks to millions of semi-rigid cells that absorb sound waves originating from outside your home. GacoWallFoam is proven to decrease exterior noise by up to 20 decibels. Because our perception of noise levels doubles every 10 decibels, GacoWallFoam has the potential to make your home up to 75% quieter.

COMMON NOISE LEVELS

ITEM	VOLUME (dB)
Motorcycle Traffic	100 dB
Passenger Vehicle Traffic	85 dB
Truck Traffic	90 dB
Barking Dog	85 dB
Jet Airplane	140 dB
Car Alarm	100 dB
Lawn Mower	107 dB

ABOUT GACO WESTERN

From NASA to your Neighborhood Gaco Western leads the industry through product Innovation. Founded in 1955 Gaco Western remains today a family-owned business with its roots in technology and product innovation. The Gaco family of brands offer best-of-class solutions for a variety of commercial, industrial, and residential applications. These applications include specialty coatings for commercial roof, pedestrian, and traffic decking; spray polyurethane insulation for commercial, industrial and residential applications; specialty roof and deck coatings for residential. Products are available nationwide. For more information visit www.gaco.com or call 877-699-4226.

COMMERCIAL APPLICATIONS FOR GACO WALLFOAM

U.S. military troop tents in Afghanistan

Exterior insulation and air barrier

Interior insulation and air barrier

Under slab insulation and moisture barrier

Insulation for industrial storage tank

Retaining wall insulation and moisture barrier
